Description:

Long Live Pharma is a duly registered company engaged in manufacturing with business address at Malanay, Sta. Barbara, Pangasinan. The company is represented by its General Manager, Mr. Racky D. Doctor. Since year 2007 to present, Long Live Pharma as a product manufacturer, is a private partner of the Department of Health (DOH), the World Health Organization (WHO) and other stakeholders in the implementation of the ?SAFE WATER SYSTEM Project or the HYPOSOL FOR SAFE WATER? intervention in the Philippines. As a partner in-charge in product manufacturing, Long Live Pharma produces ?Sodium Hypochlorite 1.25% solution? (HypoSol / Waterine) which is one of the major component of the project. First and one of its kind in the country, the product is a point-of-use drinking water disinfectant which is bought by the partners who in turn distributes to communities and households during calamities such as flood and typhoons to provide affected communities access to safe water. The facility is assisted by the WHO, DOH and DOST-1. Consistent with its vision to be a leader in the manufacture of innovative health products such as Waterine, Long Live Pharma shall also provide toll packaging services to other companies and aim to manufacture more health products like; micronutrient powder, fortified foods and juice drink. As a growing company, Long Live Pharma recognizes the big opportunity in the manufacturing industry, thus will pursue on products that will contribute solutions of great impact to the society.
